

INGA INNOVATION HUB

PRESENTATION TO REIIF

7 August 2024

ORANA

ABOUT INGA

INGA is designed to support critical industry and business development in the Orana, Central and Far West regions of NSW aligned to priority industries.

INGA INNOVATION HUB

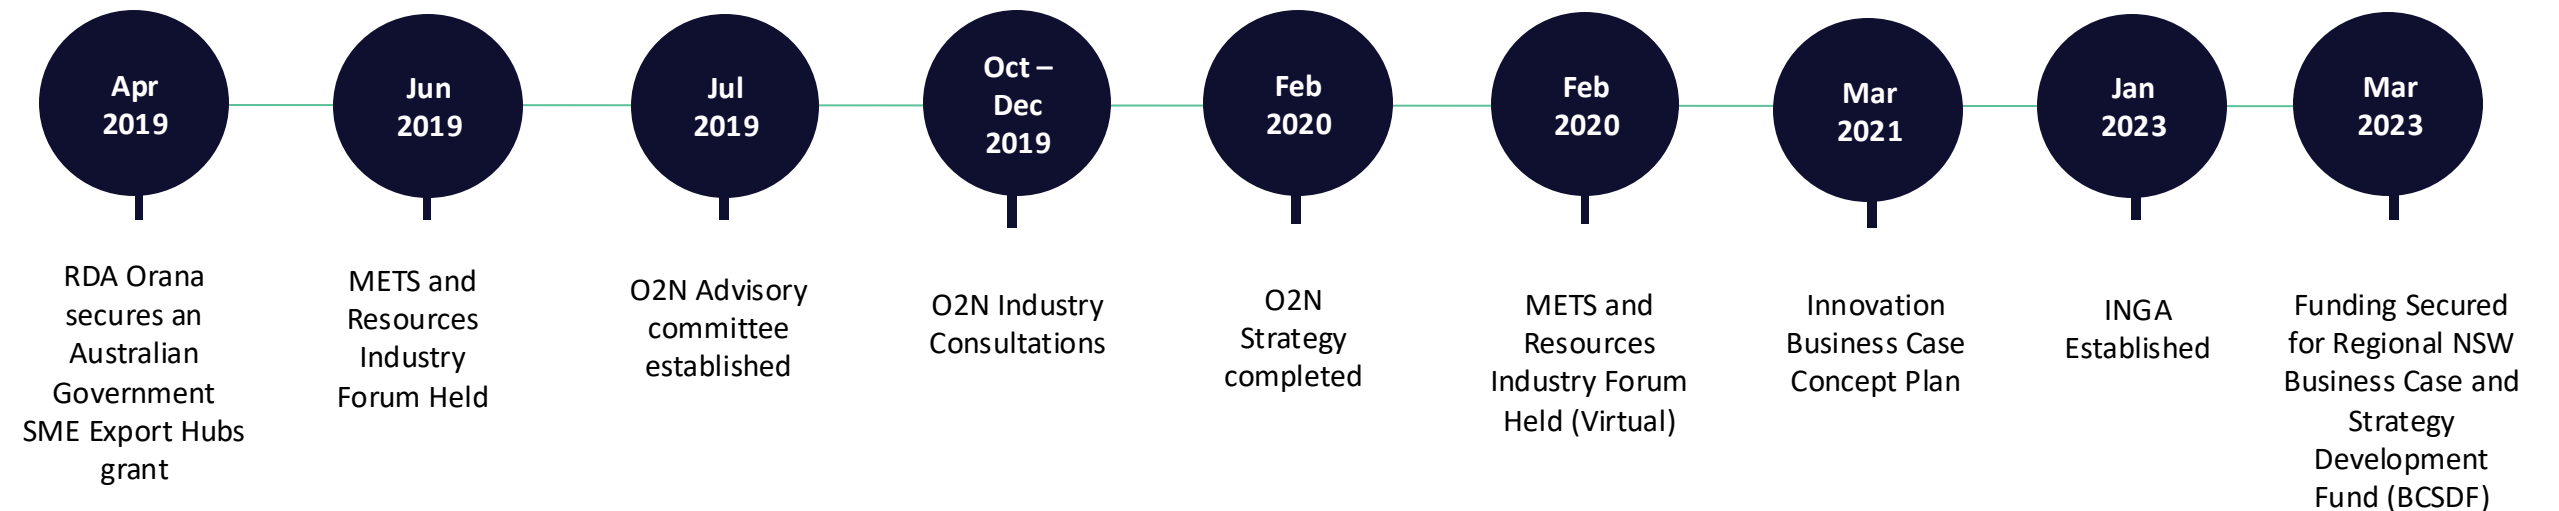

INGA Innovation Hub aims to be a catalyst for resources and clean energy innovation across regional NSW with a unique Hub-and- Spoke approach.

BACKGROUND

The INGA Innovation Hub Business Case was seeded as a core initiative of INGA, and has progressed since the March 2021 Concept Study.

WHY NOW

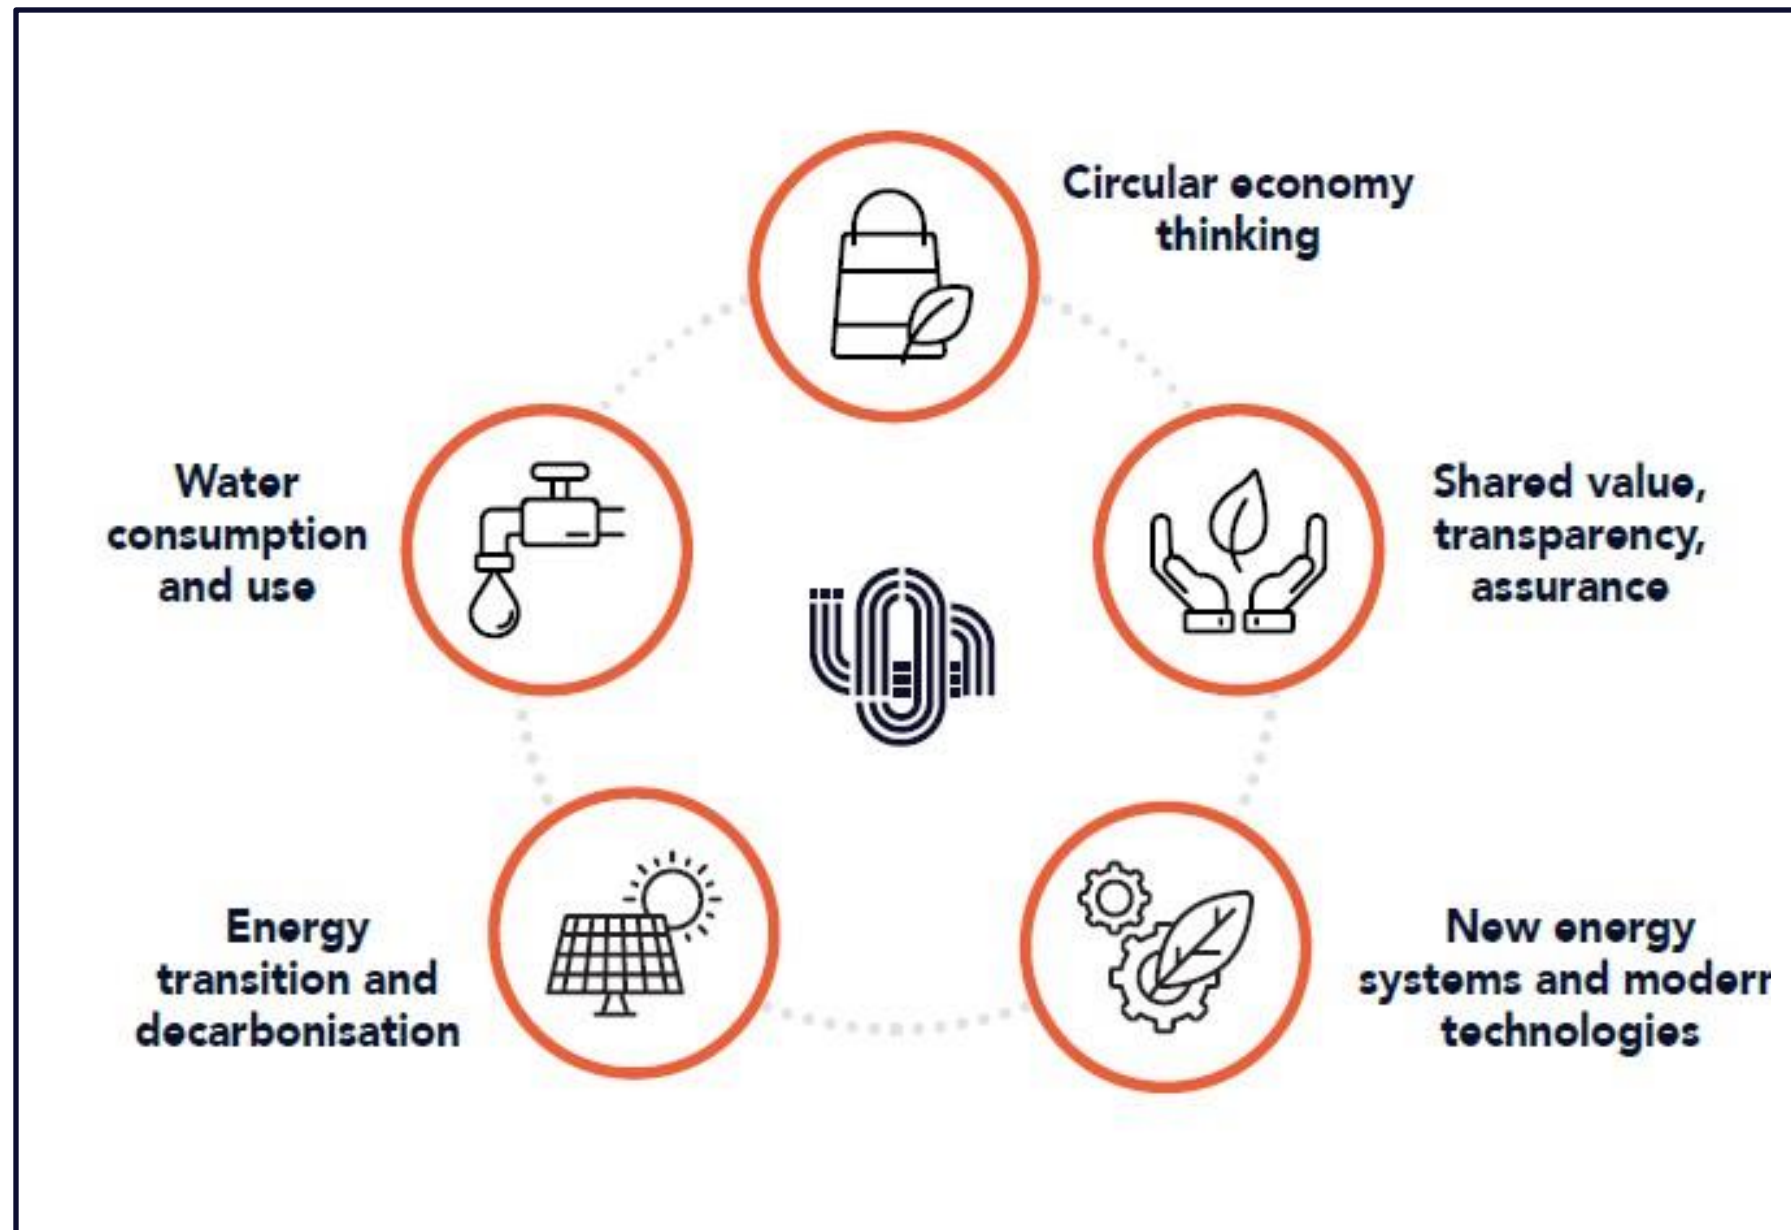

The Orana, Central and Far West regions offer strong potential to provide essential resources supply and energy generation to fuel the NSW economy into the future.

The resources sector is the leading contributor to the region's economy, accounting for \$4.3 billion (or nearly 25%) of the area's total economic value.

The region is the first declared REZ in the State.

WHY NOW

A complex relationship exists when seeking to unlock innovation due to systemic barriers that exist across the industry and the broader ecosystem.

ABOUT THE INGA HUB

A model of partnership,
underpinned by physical
infrastructure and
enabling programs

BUSINESS CASE OVERVIEW

The Business Case provides the background, justification, guiding principles and objectives of the Hub and outlined a delivery plan over three stages to progress development.

Stage 1 Hub

Plan and deliver the INGA Innovation Hub

Stage 2 Spoke

Plan and deliver and connect 'spoke' or satellite facilities across and beyond the region

Stage 3 Enable

Develop and sustain the innovation ecosystem

A PARTNERSHIP MODEL

The Business Case outlines the significant opportunity to create impact in, and for, NSW by supporting the development and adoption of resources and energy technologies through a model of partnership and shared value.

EXPECTED OUTCOMES

A range of benefits to the Orana, Central and Far West.

INGA HUB OPERATION

The Business Case explored the opportunity to connect to an experienced Hub operator, with networks in the resources, METS and energy sectors and significant expertise in innovation development and investment attraction.

NEXT STEPS

The INGA Innovation Hub is progressing to the next stage to support the delivery of Stage 1 - Hub and Stage 2 - Spoke.

A program of works to progress additional, consultation, design and review activities that together will optimise the Stage 1 – Hub location, Stage 2 – Spoke approach and cement the success of the INGA Innovation Hub model through inclusive design-lead development.

THANKYOU
